

MIST COOLING SYSTEMS *for ALL GOLF CARTS and*
OTHER OPEN AIR VEHICLES *from* **PATIO COMFORTS**

Reduces Temperatures Up to 20 Degrees So You Can Enjoy a Round in Comfort on Even the Hottest Summer Afternoons.

MIST COOLING SYSTEMS *for* ALL GOLF CARTS *and* OTHER OPEN AIR VEHICLES *from* PATIO COMFORTS

Our golf cart mist cooling system uses evaporative cooling to reduce temperatures in your golf cart or other open air vehicle up to 20 degrees.

It carries enough water for a full, 18 hole round of golf and operates off the cart's batteries with no performance loss to the cart.

The systems 2 nozzles direct mist into the driver's and rider's seating areas, allowing players to enjoy a round on even the hottest Summer afternoons.

The pump is built into the reservoir and the unit can be installed in minutes without the use of tools. The pump can be run continuously and even run dry without damage.

In most cases, the systems pay for themselves in a couple of months, through increased cart fees and rentals alone. Not to mention the extra greens fees from increased traffic on hot afternoons.

Whether you're buying for a whole fleet of carts, or an individual cart for personal use, you'll wonder how you ever got along without mist cooling.

For more information or a demonstration, give Bob Stubbs a call at one of the numbers below or email him at bstubbs@patiocomforts.com

FEATURES:

- Installs in any cart in minutes in minutes
- Reduces temperatures up to 20 degrees
- Everything included: reservoir, pump, battery connectors, feed lines, and mist heads.
- Simple, accessible on/off switch
- 1 year manufacturer's warranty
